

**ALGEBRA**

1. Students are standing in an assembly. There are 17 students in a row. What is the rule which gives the number of students, given the number of rows?
2. Geeta is Rohan's younger sister. Geeta is 7 years younger than Rohan. Can you write Geeta's age in terms of Rohan's age? Take Rohan's age to be  $n$  years.
3. The side of an regular pentagon is 5.5 cm. Find it's perimeter.
4. A cuboid is a three-dimensional figure as shown here.

The length and breadth cuboid is given by  $l$  and  $b$ . Find the formula for the total length of the edges of a cuboid.

5. Give expressions in the following cases.

- I. 15 added to  $2x$
- II. 11 subtracted from  $2y$
- III. 3 times  $n$  to which 3 is added
- IV. 2 times  $y$  from which 9 is subtracted
- V.  $p$  is multiplied by  $-8$
- VI.  $q$  is multiplied by 3 and then  $-5$  is added to the result
- VII.  $y$  is multiplied by  $-4$  and the result is subtracted from 20
- VIII.  $z$  is multiplied by 6 and the result is added to  $-6$ .
